PROFILE

M.Sc. Statistics graduate with strong foundations in data analytics, statistical modelling, and machine learning. Proficient in Python, R, Excel, SPSS, and Power BI for exploratory data analysis (EDA), regression modelling, and data visualization.

Skilled in hypothesis testing, probability distributions, and Statistical Process Control (SPC) for data-driven decision-making and quality analysis. Experience through academic projects in applying machine learning algorithms (classification, regression, clustering), 7QC tools, and building interactive dashboards to solve analytical and business problems.

Skilled in AI-assisted development and web technologies (HTML, CSS, JavaScript) to build data-driven analytical solutions supporting business decision-making.

TRAINING

August 2025 – September 2025

AI Development Intern | Web Development Co-Lead

Worked on AI-assisted web development, automation, and SEO optimization for the official website of The Haryana Chess Association.

- Pioneered AI-assisted web development for www.haryanachess.com via advanced prompt engineering, generating semantic HTML/CSS/JS and implementing SEO strategies that achieved Top-2 rankings on Google & Bing and serve 500+ monthly visitors.
- Automated certificate generation handling 1000+ certificates using Python scripts, successfully reducing manual workload by 95%.
- Tech Stack: Generative AI, Python, Prompt Engineering, GitHub, Netlify

June 2025 – August 2025

Quality Analysis Intern, EGLO India Production Pvt. Ltd.

Performed statistical quality analysis on manufacturing components to evaluate production accuracy and improve process reliability.

- Conducted statistical quality analysis on threaded tubes (Ø16.3×0.9mm), (M15×1×20mm) to evaluate manufacturing accuracy and product quality.
- Utilized 7QC Tools for defect detection, process monitoring, and data-driven quality assessment.
- Collaborated with the engineering team to perform root cause analysis, helping reduce process variation.
- Enhanced manufacturing consistency through continuous statistical process monitoring and quality improvement initiatives

PROJECTS

"Customer Profitability Analysis"

Built a customer segmentation model using K-Means clustering to group customers based on revenue, profit, purchase frequency, and average order value. Identified four distinct customer segments, including high-value loyal customers and one-time high spenders, and generated actionable insights to improve customer retention, targeting, and overall revenue through data-driven marketing strategies.

"Insurance Lead Conversion Prediction"

Built a machine learning classification model using Random Forest to predict lead conversion. Performed feature engineering including engagement score, claim risk, and discount ratio. Developed and deployed a Streamlit dashboard for real time prediction and revenue estimation.

"Quality Optimization Report – Precision Components"

Performed Statistical Process Control (SPC) and 7QC-based quality analysis on threaded tube manufacturing data (Ø16.3×0.9mm), M(15×1×20mm) to identify production defects and process variation. Applied root cause analysis and process capability evaluation to recommend data-driven quality improvements, enhancing manufacturing stability.

EDUCATION

Kurukshetra University | August 2024 - June 2026: **M.Sc. in Statistics**

IIT Guwahati | 2023 - 2027: **B.Sc. in Data Science and Artificial Intelligence**

Delhi University | 2021 – 2024: **B.Sc. in Mathematics**

12th Standard: 94.16% | 10th Standard: 90.8%

KEY SKILLS AND CHARACTERISTICS

- Statistical Data Analysis and Interpretation using Python, R, and SPSS.
- Data Cleaning, Data Visualization, and Exploratory Data Analysis (EDA).
- Statistical Process Control (SPC) and application of 7QC Tools for quality analysis.
- Experience in AI-assisted development and prompt engineering.
- Basic Web Development: HTML, CSS, JavaScript for responsive web applications.
- Data-driven decision making and problem-solving using analytical techniques.
- Experience working with real datasets in manufacturing quality analysis and tournament analytics.
- Strong analytical thinking, research ability, and collaborative teamwork.

TECHNICAL SKILLS

- Programming: R, Python
- Data and Analytics: SPSS, Power BI, Microsoft Excel
- Machine Learning: Regression, Classification, Clustering, Decision Trees, Random Forest, SVM, k-NN, Neural Networks; Model Evaluation
- Development Tools: VS Code, GitHub, Netlify
- Operating Systems: Windows 10/11 | Productivity: Microsoft Office

ACTIVITIES AND INTERESTS

- Public Speaking
- Reading
